Techtride AQ 7400 CC

Parts Cleaning Technologies Techtride 7400 CC is a high alkaline, water based cleaner which has been proven to give excellent cleaning results through extensive laboratory and “in field” testing. The 7400 CC cleaner is specially designed for heavy-duty removal of carbon based soils such as deep draw lubricants, stamping and machining oils and other similar lubricants.

A 7400 CC cleaning system is formulated to be used in both Spray and Immersion Systems and can be used in conjunction with ultrasonics. The bath contents are designed to be 100% rinse able leaving little or no residue and are compatible with most materials of construction used in industrial parts cleaning systems.

Parts Cleaning Technologies has a fully staffed laboratory and cleaning equipment engineering department. Parts can be submitted for extensive cleaning tests. We also are licensed to collect and properly dispose of spent cleaning solutions.

Product Bulletin for: Techtride AQ 7400 CC

Product Properties

pH @ 10% = > 12.5

Flash Point = None to Boiling

Water Soluble = Complete

VOC, 10% = <0.10 g/L
